

CARBONITE BLACK SOLO

Ross Video has a complete range of technical services available to ensure that your Carbonite Black Solo installation is a success.

Operational Training can be provided at Ross Video, on-site or on the web. Experienced Ross operators will teach your staff to get the most out of your new system, and enhance your productions.

Commissioning is a service to help get your Carbonite Black Solo system properly configured, connected and installed. This service is performed by factory trained Ross technical staff.

Technical Training can be provided at Ross Video, on-site or over the web. Technical training will teach your engineering staff the technical details of the system you have purchased. System configuration, interfaces, databases, and routine maintenance procedures are some of the topics covered.

Carbonite Black Solo comes standard with a 1 year comprehensive warranty. **Extended Warranties** on hardware and software maintenance are available for an annual fee.

Technical advice is available on-line, by telephone, or email to Ross Video – **Free for the life of your system.**

CARBONITE BLACK SOLO

Carbonite Black Solo is packed full of the features that Carbonite owners love to use every day. It delivers incredible video production horsepower in an amazingly compact and affordable package. Whether looking to equip a production studio, flight pack, or add a back up switcher, Solo is the answer.

No ordinary compact production switcher, Carbonite Black Solo packs an astounding feature set. The powerful, single ME in Solo, includes 4 keyers plus a transition keyer, for DVE and Media Wipes, as well as, one high quality Ultrachrome chroma keyer. Solo also comes equipped with 2 MiniMEs – perfect for use in event production or for secondary outputs. Each MiniME has two keyers of its own - providing Solo with an amazing 9 keyers in total. Solo's impressive video feature set also includes: a MultiViewer and Four MediaStores for animated graphics and stills.

Solo is unmatched in its class in the ability to control devices - sporting robotic camera, video server and audio mixer control interfaces. It is integrated with Ross' DashBoard making it possible for you to create a purpose built user interface for a specific production environment. Solo can also be used with ViewControl, a touch screen user interface that integrates the live Solo MultiViewer into a touch screen control panel and makes running a production super-easy.

Pairing Solo with Ross' XPression Real Time Motion Graphics and ACID camera systems results in a tightly integrated solution to produce all kinds of awesomely creative live media.

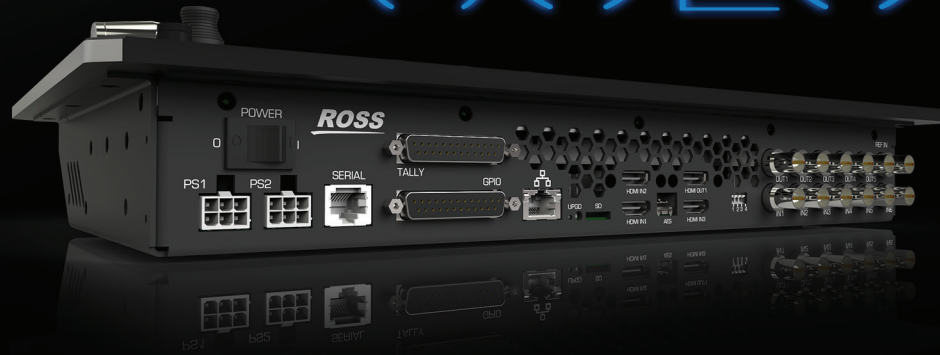

Carbonite Black Solo is available three ways. The first is the beautifully styled, all-in-one with combined control panel and electronic processing, offering maximum portability. The second, the rack mount electronic frame with soft control panel is the most cost effective. And the third a control panel plus separate electronic frame is for installations where it is desirable to separate operation from electronics.

Best of all, Solo is designed, built and backed by Ross - the world leader in live production technology.

Carbonite Black Solo - The perfect fit for smaller productions where quality and operational performance is essential, in a package that is remarkably affordable.
